CENTRAL DRAINAGE POINT

ANCHORING SYSTEM: 1 HOLE

THE OPENINGS ARE SEALED  
WITH PP CAPS AFTER  
INSTALLATION

REINFORCED CORNER DESIGN  
ALLOWS QUICK INSTALLATION AND  
KEEPS THE SEAT SECURELY FIXED

# MT-2042

## DESCRIPTION

### Product Overview

The MT-2042 single-layer stadium seat is designed as a modern, durable seating solution for stadiums, arenas, and multi-purpose venues where comfort, safety, and long service life are essential. Its medium-height back profile combined with a backless shell configuration makes it especially suitable for conventional narrow-tread grandstands, as well as telescopic and dismountable bleacher systems.

Manufactured using advanced injection molding technology, the MT-2042 is produced from high-quality stabilized copolymer polypropylene, offering excellent structural strength and dimensional stability under continuous use in demanding public environments. Its lightweight construction and functional design make it an efficient and adaptable choice for both permanent and temporary seating installations.

### Key Features & Technical Highlights

#### Material & Manufacturing

- Injection-molded construction
- High-quality stabilized copolymer polypropylene (PP)
- Excellent dimensional stability and structural strength
- Designed for intensive public use

#### Dimensions & Weight

- Width: 40 cm
- Depth: 40 cm
- Height: 27 cm
- Weight: 1.2 kg
- Lightweight design for easy handling and installation

#### Surface Finish

- Matte textured surface
- Anti-glare finish suitable for indoor and outdoor environments
- Maintains a clean, professional appearance over time

#### Durability & Structural Strength

- Fully sealed perimeter prevents dust, dirt, and moisture accumulation
- UV-stabilized with anti-UV additives
- Resistant to color fading and material brittleness caused by sun exposure
- Suitable for outdoor installations in harsh climates

#### Ergonomic Design

- Medium-height back profile for basic support
- Ergonomically curved front edge for improved user comfort
- Right-angle base overlaps neatly with terrace steps

#### Installation Flexibility

- Individual installation: step mounted, floor mounted, or riser mounted
- Collective installation: on fixed or mobile benches
- Compatible with both concrete and metal stands

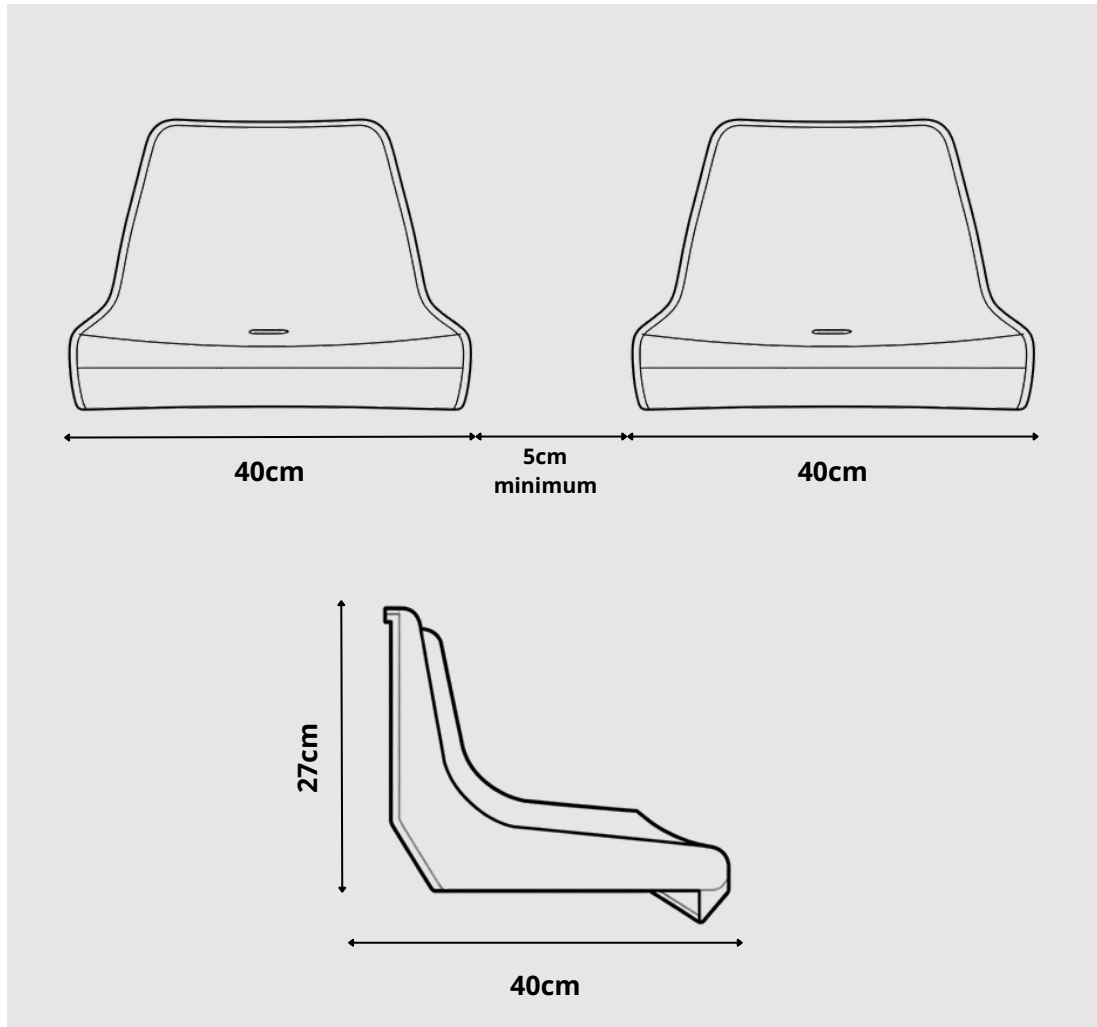

#### Standards & Warranty

- Engineered for durability, dimensional stability, and long-term use in public venues
- Backed by a 5-year manufacturer warranty covering color fading, material defects, and manufacturing defects

## INSTALLATION

### Concrete:

Installation is carried out using one anchoring point.

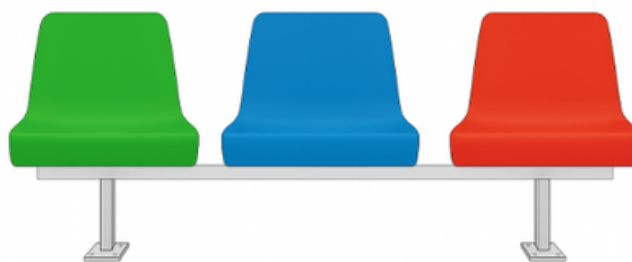

The anchoring point requires: one 6 mm screw, one 8 mm wa plug (fischer), and one flat washer sized M6.

### Metal Stands:

Installation is carried out using one anchoring point.

The anchoring point requires one bolt, one nut, and one washer, with sizes determined by the hole dimensions provided.
